VIP Industry Affiliates

Through the Vertically Integrated Projects (VIP) Program, companies can connect with more than 80 multidisciplinary student teams embedded in faculty scholarship and exploration. As VIP Industry Affiliates, companies can identify and reach:

- **Motivated students early in their academic careers**
  - VIP attracts sophomores, juniors and seniors actively seeking challenges beyond the classroom. Students can participate for multiple semesters, with new students replacing graduates, and returning students taking on leadership roles within the teams.

- **Large number of students from many majors**
  - The VIP Program is growing exponentially, with 81 teams and almost 1300 students in Spring 2020. Each team is multidisciplinary by design. VIP attracts students from approximately 30 majors representing every school on campus.

- **Students doing real-world R&D in company’s areas of interest**
  - VIP Teams are embedded in faculty scholarship and exploration, with students applying cutting-edge methods and technologies to real-world projects. Companies can search teams by discipline, technology or keyword to determine which team(s) they wish to support. Interactions with students are tailored based on the specific interests of the company and the team (e.g., career/technical presentations, feedback, tours, etc.).

- **Team-oriented students with stronger:**
  - Ability to succeed in a diverse, multidisciplinary environment
  - Professional skills
  - Understanding of technology applications
  - VIP cultivates a culture of peer-mentorship, with returning students onboarding new students and taking on increasing levels of responsibility each semester. In Georgia Tech exit surveys, VIP students reported higher scores in their:
    - Ability to work in a multidisciplinary team;
    - Ability to work with individuals from diverse backgrounds;
    - Understanding of technology applications relevant to their fields of study.
